

61. (Amended) A method for the production of a pharmaceutical composition, comprising identifying an inhibitor of the interacting molecules identified by the method of claim 1, and formulating said inhibitor in a pharmaceutically acceptable form.

62. (Amended) A method for the production of a pharmaceutical composition, comprising

- i) identifying an interacting molecule by the method of claim 1,
- ii) identifying a further molecule of a cascade of interacting molecules of which at least one of said identified interacting molecules is a part, and
- iii) formulating said further molecule in a pharmaceutically acceptable composition.

Please add the following new claim:

67. (New) A method for the production of a pharmaceutical composition, comprising

- (i) identifying an interacting molecule by the method of claim 1,
- (ii) identifying a further molecule of a cascade of interacting molecules of which at least one of said interacting molecules identified in (i) is a part,
- (iii) identifying an inhibitor of the function of said further molecule, and
- (iv) formulating said inhibitor in a pharmaceutically acceptable form.

*The clean version of claims presented above incorporate changes as indicated by the marked-up versions below.*

60. (Amended) A method for the production of a pharmaceutical composition, comprising carrying out the method of claim 1 and formulating at least one identified member of the interacting molecules [identified by the methods of claim 1] in a pharmaceutically acceptable form.

61. (Amended) A method for the production of a pharmaceutical composition, comprising identifying an inhibitor of the interacting molecules identified by the method of claim 1,
